

**Patent claims**

1. An active compound combination, comprising a compound of the formula (I)

and

- 5 (1) a compound of the formula (II)

and

- 10 (2) a compound of the formula (III)

15

2. The composition as claimed in claim 1, characterized in that in the active compound combination the weight ratio of active compound of the formula (I)

to active compound of the formula (II) is from 1:0.1 to 1:10 and

to active compound of the formula (III) is from 1:0.05 to 1:10.

- 5    3.    A method for controlling fungi, characterized in that an active compound combination as defined in claim 1 is allowed to act on the fungi, their habitat or the plants, parts of plants, seeds, soils, areas, materials or spaces to be kept free from them.
- 10    4.    The method as claimed in claim 3, characterized in that the compound (I) as claimed in claim 1, the compound (II) as claimed in claim 1 and the compound (III) as claimed in claim 1 are applied simultaneously, that is jointly or separately, or in succession.
- 15    5.    A propagation material which has been treated by a method as claimed in claim 3.
6.    A fungicidal composition, comprising an active compound combination content as defined in claim 1.
- 20    7.    The use of the active compound combination or the composition as defined in claims 1, 2 and 6 for controlling fungi.
8.    A process for preparing fungicidal compositions, characterized in that an active compound combination as claimed in claim 1 is mixed with extenders and/or surfactants.
